HOW IS INFORMATION ORGANISED?

Information in TRIP is organised into 24 transport themes, grouped by five different areas.

- **Mode** - Air, Rail, Road, Urban, Water, Multimodal;
- **Sector** - Freight, Passenger;
- **Evaluation** - Long-term perspectives, Assessment and decision support methods, Environmental impacts, Economic and regional impacts, Accessibility;
- **Technology** - Intelligent transport systems, Innovative technologies, Transport management;
- **Policy** - Financing, Regulation, Infrastructure and TEN-T, Land use and transport planning, Climate policy and energy efficiency, Security and safety, Cohesion and EU neighbouring policy, Awareness and user rights.

Questions?

contact the TRIP helpdesk at helpdesk@transport-research.info

TRIP is funded by the European Commission’s Directorate General for Mobility and Transport under the Seventh Framework Programme for Research and Technological Development (FP7).
Previously TRKC, TRIP has been a strong contributor to dissemination and promotion of transport research and innovation since the initiative was created in 1997.

WHAT IS TRIP?
TRIP is the one single portal for all transport research conducted at European and national levels.

COMPONENTS of TRIP
- **Project Database** of more than 7,000 transport research related projects;
- **Country Profiles** presenting national institutions and organisations responsible for promoting and supporting transport research;
- **Programmes** for research and innovation in transport;
- **Policy Brochures** presenting highlights of the research results according to policy topics, and **Research Summaries** on 24 transport themes;
- **Videos** for each policy brochure;
- **News** of the latest in transport research, policies and innovation including monthly e-Newsletters;
- **Events Calendar** of high-level international transport conferences.

WHO BENEFITS?
Policy makers at the local and national level, in the EU and beyond, researchers of transport and mobility, RTD professionals, service providers, research users, and citizens can all benefit from TRIP.

TRIP increases awareness, understanding, and active take-up of transport activities and results. Easy access to the most up to date information is key to building and sharing knowledge, creating solutions, and innovating for the future.
